10am- [Guided Mountain Bike Tour](#)

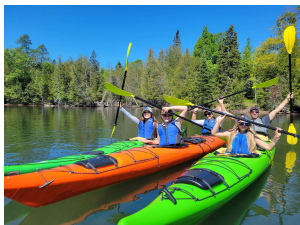

Explore Copper Harbor's world-class mountain bike trails with an expert guide to show you the way. The trails truly have something for everyone whether you are a beginner, intermediate, or advanced rider. (Tour participants will be divided into smaller groups by skill level.) If this is your first time trying downhill mountain biking we'll start you off with basic instruction from our guide and then shuttle you to the beginner trails to start your adventure. For those more comfortable riders we'll start you on the more advanced trails and help you to improve your skill and ability. No matter your skill, a guide will be with you to explain what to expect on the trails and ensure that the trails you are on are at your skill level. We keep our groups small so that you'll have plenty of opportunity to interact with the guide and ensure that you'll have a great time!

All of our tours include a state-of-the-art, full-suspension mountain bike which guarantees you'll have the best experience on the trails. Additionally, all tours include transportation on our mountain bike shuttle van to get you to the best part of the trails (no time-wasting, uphill climbs!)

12:30pm- Lunch in the park

1:30pm- [Porter's Island Guided Sea Kayak Tour](#)

This Lake Superior kayak tour begins with outfitting and basic, on-land instruction with ACA certified kayak guides. You'll learn about the kayak, gear, some basic paddle strokes, and safety awareness. This is a great tour for beginners and experienced paddlers alike.

Following the instruction, we'll head out into the protected waters of Copper Harbor. Explore ancient rock shoreline, an uninhabited island, and learn about the history of the largest, natural harbor on the Keweenaw Peninsula. Discover how ancient volcanoes covered this region over one billion years ago, the formation of the Lake Superior basin, and the resulting relevance of the Keweenaw Peninsula's geology and mineral wealth over the ages.
